EDUCATION

Greater Noida Institute of Technology

Aug '23 – Jun '27

Bachelor of Technology in Computer Science — CGPA: 8.8/10

EXPERIENCE

Nayoda — Software Engineering Intern

Mar '26 – Apr '26

IT solutions company delivering web & mobile app development and structured internship-to-placement programs

- **Built and shipped production-ready** full stack features with React.js, Node.js, Express.js, and MongoDB, applying OOP principles to keep the codebase maintainable across a **team of 4 engineers**.
- Designed and delivered **6+ RESTful API endpoints** consumed by the frontend, enabling reliable client-server communication after gathering requirements directly from stakeholders.
- Debugged and resolved production issues through systematic root-cause analysis and code review, **cutting recurring bugs by 15%** and **improving application reliability**.
- Delivered **3+ features on schedule across 2 sprints** by managing priorities and collaborating via Git, GitHub pull requests, and Agile ceremonies.

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript, TypeScript

CS Fundamentals: Data Structures & Algorithms, Operating Systems, OOP, DBMS, Computer Networks

Development: React.js, Next.js, Node.js, Express.js, RESTful APIs, JWT Auth, HTML5, CSS3, Tailwind CSS

Data & Tools: MongoDB, MySQL, Redis, Git, GitHub, Postman, Docker

Cloud & Deployment: AWS, Azure, Vercel, Render

PROJECTS

Enterprise RAG Assistant

Jun '26

- Built a production-ready Enterprise RAG Assistant with Next.js, FastAPI, FAISS, and the Gemini API across **23 commits**, enabling accurate **AI-powered Q&A** over large document sets.
- Engineered a retrieval pipeline using **500-character chunks with 100-character overlap** across **2 core API endpoints**, applying **top-5 similarity retrieval** to improve context accuracy for enterprise knowledge search.
- Built an evaluation framework scoring responses across **3 evaluation dimensions**, and integrated session-based conversational memory with cloud deployment for always-available Q&A.

AutoPM AI

Mar '26

- Engineered full-stack features (React.js, Node.js, Express.js, MongoDB) across **10 commits**, shipping **2 REST endpoints and 2 MongoDB models** to production.
- Built **2 automation agents** to streamline core project-management workflows, validating backend APIs via Postman and resolving issues pre-deployment to prevent downstream bugs.
- Contributed to Agile delivery through active participation in GitHub pull request reviews.

FoodLink

Sep '25 – Nov '25

- Built a MERN application connecting food donors with NGOs as part of a **9-contributor team**, personally authoring **approximately 83 of the repository's 112 commits**.
- Designed **4 MongoDB models and 13 RESTful API endpoints** supporting food listings, approvals, and request processing across **16 frontend routes**.
- Integrated cloud-based image uploads and location-aware matching, improving resource accessibility for NGOs and donors.
- Optimized database operations, **boosting API responsiveness** and overall application efficiency.

CODING PROFILE & ACHIEVEMENTS

- **Guardian on LeetCode (Contest Rating: 2146)**; Knight on LeetCode (Contest Rating: 1923).
- **Solved 700+ Data Structures & Algorithms problems** on LeetCode; strong command of Graphs, Trees, Dynamic Programming, Greedy Algorithms, and Hashing.
- **Semi-finalist**, ET-AI Hackathon — The Economic Times.
- Open Source Contributor, Apertre 3.0 — reviewed and merged contributor pull requests with code feedback.
- Participated in Smart India Hackathon — MIC and AICTE.
