

MISHTHI MAHAJAN

Software Engineer | Full Stack Development | Data Structures & Algorithms | AI Engineering

mishthimahaian0@gmail.com | +91 7814707811 | Greater Noida, India | [linkedin.com/in/mishthi-mahaian-024828278](https://www.linkedin.com/in/mishthi-mahaian-024828278) | github.com/mishthimahaian | leetcode.com/u/Mishthimahaian

PROFESSIONAL SUMMARY

Computer Science undergraduate (Bachelor's, graduating 2027) with a strong fundamental understanding of computer science, backed by 700+ problems solved on LeetCode (Contest Rating 2146) and a Guardian ranking. Hands-on programming experience in C/C++, Python, and JavaScript/TypeScript through internships, personal projects, and coursework. Previous internship and open-source contribution experience (Apertre 3.0) reviewing and giving feedback on pull requests, plus a track record of quickly learning unfamiliar codebases and shipping production-ready features across the frontend and backend. Comfortable collaborating with stakeholders and teammates in Agile, Git-based environments.

EDUCATION

Greater Noida Institute of Technology

2023 – 2027

Bachelor of Technology in Computer Science — CGPA: 8.8/10

EXPERIENCE

Nayoda — Software Engineering Intern

Mar '26 – Apr '26

- Applied object-oriented engineering principles to build production-ready application software using React.js, Node.js, Express.js, and MongoDB.
- Gathered requirements from stakeholders and designed RESTful APIs consumed by frontend applications for reliable client-server communication.
- Resolved production issues through systematic debugging and code review, applying feedback and best practices to improve reliability.
- Managed time and priorities to deliver features on schedule, collaborating via Git, GitHub pull requests, and Agile practices in a cross-functional team.

TECHNICAL SKILLS

Programming Languages: C++, C, Python, JavaScript, TypeScript

CS Fundamentals: Data Structures & Algorithms, Operating Systems, Object-Oriented Programming, DBMS, Computer Networks

Application & Backend Development: React.js, Next.js, Node.js, Express.js, RESTful APIs, JWT Authentication

Frontend: HTML5, CSS3, Tailwind CSS

Databases & Caching: MongoDB, MySQL, Redis

Developer Tools: Git, GitHub, GitHub Pull Requests, Postman, Docker

Cloud & Deployment: AWS, Azure, Vercel, Render

PROJECTS

Enterprise RAG Assistant

Jun '26

- Built a production-ready Enterprise RAG Assistant with Next.js, FastAPI, FAISS, and Gemini API for intelligent document search and AI-powered Q&A.
- Optimized document processing through text extraction, chunking, vector indexing, and similarity search, ensuring accurate context retrieval.
- Integrated session-based conversational memory, REST APIs, and cloud deployment for seamless enterprise knowledge management.

AutoPM AI

Mar '26

- Engineered full-stack application features using React.js, Node.js, Express.js, and MongoDB for production use.
- Designed and integrated RESTful APIs enabling seamless frontend-backend communication.
- Quickly adapted to an existing codebase, validating backend APIs through Postman and resolving issues before deployment.
- Participated in GitHub pull request reviews while collaborating in an Agile development environment using Git.

FoodLink

Sep '25 – Nov '25

- Created a MERN application connecting food donors with NGOs through an efficient donation management workflow.
- Structured database models and backend endpoints supporting food listings, approvals, and request processing.
- Integrated cloud-based image uploads alongside location-aware matching to improve resource accessibility.
- Refined database operations to enhance API responsiveness and overall application efficiency.

CODING PROFILE & ACHIEVEMENTS

- Guardian on LeetCode (Contest Rating: 2146); Knight on LeetCode (Contest Rating: 1923).
- Solved 700+ Data Structures & Algorithms problems on LeetCode; strong command of Graphs, Trees, Dynamic Programming, Greedy Algorithms, and Hashing.
- Semi-finalist, ET-AI Hackathon — The Economic Times.
- Open Source Contributor, Apertre 3.0 — reviewed and merged contributor pull requests with code feedback.
- Participated in Smart India Hackathon — MIC and AICTE.
